

The best neighborhood  
in Toronto to open a  
Greek restaurant

---

# Agenda

---

- Introduction to the problem
- Data collection and manipulation
- Machine learning application
- Results

# Introduction to the problem

---

- **Problem** : Recommendation of the best area in Toronto for somebody who wants to start a Greek restaurant
- **The idea** : Find all neighborhoods in Toronto that have Greek restaurants and recommend the neighborhood with the least competition for a new entrepreneur.
- Based on geographical data.

# Data collection and manipulation I

Data collected from 3 sources by :

- Scraping Wikipedia table for Toronto postal code
- Using geocoder library to get coordinates of each neighborhood
- Using Foursquare API to detect all the venues on each neighborhood

	Postal Code	Borough	Neighbourhood
0	M3A	North York	Parkwoods
1	M4A	North York	Victoria Village
2	M5A	Downtown Toronto	Regent Park, Harbourfront
3	M6A	North York	Lawrence Manor, Lawrence Heights
4	M7A	Downtown Toronto	Queen's Park, Ontario Provincial Government

Wikipedia data

	Postal Code	Borough	Neighbourhood	Latitude	Longitude
0	M3A	North York	Parkwoods	43.753259	-79.329656
1	M4A	North York	Victoria Village	43.725882	-79.315572
2	M5A	Downtown Toronto	Regent Park, Harbourfront	43.654260	-79.360636
3	M6A	North York	Lawrence Manor, Lawrence Heights	43.718518	-79.464763
4	M7A	Downtown Toronto	Queen's Park, Ontario Provincial Government	43.662301	-79.389494

Geocoder cords addition to Wikipedia data

# Data collection and manipulation II

## Collecting data from Foursquare API:

- Sending a request to API
- Requesting all the venues in a 500m radius from each Toronto's neighborhood
- Receiving all the venues with their information (i.e. cords, type etc.)
- Organizing all the features in one dataframe in order to match the venues with their neighborhood

	Neighbourhood	Neighbourhood Latitude	Neighbourhood Longitude	Venue	Venue Latitude	Venue Longitude	Venue Category
0	Parkwoods	43.753259	-79.329656	Brookbanks Park	43.751976	-79.332140	Park
1	Parkwoods	43.753259	-79.329656	Variety Store	43.751974	-79.333114	Food & Drink Shop
2	Victoria Village	43.725882	-79.315572	Victoria Village Arena	43.723481	-79.315635	Hockey Arena
3	Victoria Village	43.725882	-79.315572	Portugril	43.725819	-79.312785	Portuguese Restaurant
4	Victoria Village	43.725882	-79.315572	Tim Hortons	43.725517	-79.313103	Coffee Shop
...	...	...	...	...	...	...	...
2095	Mimico NW, The Queensway West, South of Bloor,...	43.628841	-79.520999	Royal Canadian Legion #210	43.628855	-79.518903	Social Club
2096	Mimico NW, The Queensway West, South of Bloor,...	43.628841	-79.520999	Koala Tan Tanning Salon & Sunless Spa	43.631370	-79.519006	Tanning Salon
2097	Mimico NW, The Queensway West, South of Bloor,...	43.628841	-79.520999	Value Village	43.631269	-79.518238	Thrift / Vintage Store

# Machine learning application I

---

## Clustering approach:

- Clustering the Neighborhood based on Greek restaurant density
- Each neighborhood might contain more than one Greek restaurants
- The goal is to find the cluster of neighborhoods with small Greek restaurant density
- For the neighborhoods of this cluster to find the one with the smallest density and recommend it

# Machine learning application II

## Data preparation:

- One-hot encoding the data based on venue category
- Grouping the venues by neighborhoods and calculating mean value of each one
  - Mean value will be the density of each venue in the specific neighborhood
- Filtering to keep only the Greek restaurants
- Keeping only the columns with Neighborhoods and Greek restaurants' densities

	Neighborhoods	Accessories Store	Airport	Airport Food Court	Airport Gate	Airport Lounge	Airport Service	Airport Terminal	American Restaurant	Antique Shop	...	Train Station	Truck Stop	Vegetarian / Vegan Restaurant	Video Game Store	Vietnamese Restaurant
0	Parkwoods	0	0	0	0	0	0	0	0	0	...	0	0	0	0	0
1	Parkwoods	0	0	0	0	0	0	0	0	0	...	0	0	0	0	0

	Neighborhoods	Greek Restaurant
4	Bedford Park, Lawrence Manor East	0.043478
5	Berczy Park	0.017241
19	Davisville	0.027778
29	First Canadian Place, Underground city	0.010000
48	Little Portugal, Trinity	0.023256

# Machine learning application III

## Clustering:

- Using K-Means ML algorithm
- K values tested (1 to 9)
- Using elbow method to determine that k=3 is the best
- Merging neighborhood density and cluster number with the initial data

	Neighbourhood	Greek Restaurant	Cluster	Neighbourhood Latitude	Neighbourhood Longitude	Venue	Venue Latitude	Venue Longitude	Venue Category
11	Bedford Park, Lawrence Manor East	0.043478	2	43.733283	-79.419750	Karbouzi Greek Taverna	43.736204	-79.420359	Greek Restaurant
53	Berczy Park	0.017241	0	43.644771	-79.373306	Alexandro's World Famous Gyros	43.641663	-79.375214	Greek Restaurant
101	Davisville	0.027778	2	43.704324	-79.388790	souvlaki express	43.707378	-79.389848	Greek Restaurant
161	First Canadian Place, Underground city	0.010000	0	43.648429	-79.382280	Estiatorio Volos	43.650329	-79.384533	Greek Restaurant

# Results I

## Clusters

- The neighborhoods organized in 3 clusters
- The creation of each cluster was based on its density
- The next step is to determine which cluster has the neighborhoods with least Greek restaurants

# Results II

---

## Counting Greek restaurants:

- Grouping all the rows of the merged data frame by the cluster number and Neighborhood
- Using count() aggregation function to count the Greek Restaurants.
- Choosing the cluster with least Greek restaurants
- Recommending the neighborhoods of this cluster with least Greek restaurants

# Results III

## Recommendation:

- From the above cluster the one with the least restaurants is **Cluster 2 (green)**
- This cluster contains only one Greek restaurant
- Best neighborhoods are **Bedford Park and Lawrence Manor East**

Greek Restaurant		
Cluster	Neighbourhood	
0	The Danforth West, Riverdale	8
1	Berczy Park	1
	Davisville	1
	Fairview, Henry Farm, Oriole	1
	First Canadian Place, Underground city	1
	Little Portugal, Trinity	1
	Toronto Dominion Centre, Design Exchange	1
★ 2	Bedford Park, Lawrence Manor East	1

Thank you!
